Summary

I'm an undergraduate student studying Electronics and Computer Science Engineering (ECSE) in my B. Tech program. I'm eager to learn and grow my skills, especially in web development and design. I'm good at HTML, CSS, and front-end development, and I also know how to use Figma and Adobe Photoshop for UI/UX design. By staying updated with the latest trends, I work to create digital experiences that are both technically sound and visually appealing, designing smooth interfaces and attractive graphics.

Education

Kalinga Institute of Industrial Technology, Bhubaneswar, Odisha
Electronics and Computer Science Engineering
7.92

2021 - 2025
